

Application of Espa-lipon for complex treatment of erectile dysfunction in men with diabetes mellitus

S.K.Kobyakov, E.V.Luchytский, V.N.Skibun

Summary. 31 male patients with diabetes mellitus and erectile dysfunction underwent a complex treatment with Espa-lipon. The results of the medical research with physical and laboratory tests, andrological examination and questioning show the effectiveness of this medication for treatment of the above mentioned pathologies. Application of Espa-lipon for complex treatment of erectile dysfunction was found to be expedient.
